

Halo Hand Controls

\$250

Limited Time Offer

Halo Hand Controls put you back in the Driver's Seat.

It's devastating to lose the independence and freedom that driving affords.

You don't need to suffer from a sudden debilitating injury to benefit from Halo Hand Controls for your car. Everyday over a thousand people lose the ability to drive. It begins with Multiple Sclerosis, or Neuropathy, sapping your energy; working to limit your flexibility and reflexes.

Hand Controls can help you conserve your energy.

By putting control of the gas and brake in your left hand, you can rest your legs and feet for the adventure ahead. Best of all, Halo Hand Controls won't interfere with the normal operation of your car. You can still use your feet on the pedals when you feel like it.

Halo Hand Controls are simple to Use.

**Pull on the red lever to Go.
Push on it to Stop.**

Halo Hand Controls are easy to install.

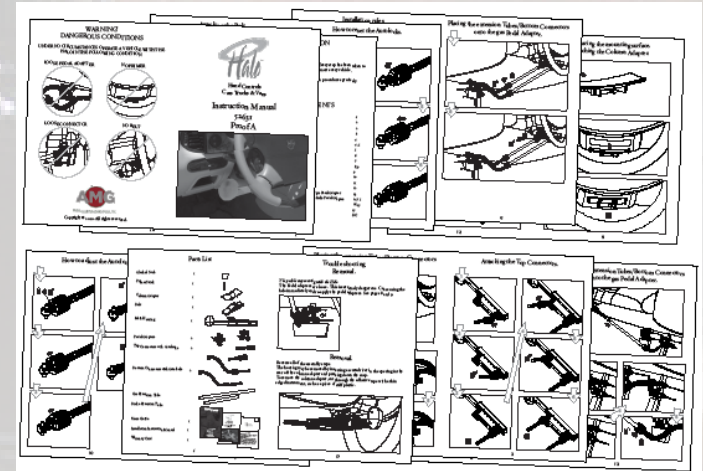

The Halo is the result of years of engineering development and testing.

Developed by Daniel Reyes, a renowned inventor who was disabled in a terrible auto accident, the Halo is the epitome of evolutionary design.

Every facet has been engineered to fit together quickly and simply. The instructions are a series of simple steps, put forth in a fully illustrated manual.
